The Welsh Mule Sheep Breeders Association has provided the sheep industry with high performing, profitable breeding ewes that have benefitted from the maximum amount of hybrid vigour for many years. The benefits of hybrid vigour are at their highest when two breeds are used and that vigour decreases as more breeds are added to the mix. The crossing of the Blue-faced Leicester with Welsh mountain and hill breeds has been a proven method of maximising the benefits of hybrid vigour.

A group of Welsh Mule breeders have asked to take the process a little further by supplying Welsh Mule ewe lambs for sale at the association's sales that have been produced by using a 'Performance' recorded Blue-faced Leicester ram: those ewe lambs are being called simply 'Performance' Welsh Mules.

In order to qualify to market their sheep as 'Performance' Welsh Mules, breeders will have to meet a few simple qualifying criteria.

'Performance' Welsh Mule breeders will need to work with the Blue-faced Leicester Association and the Welsh Mule Sheep Breeders Association to formally identify 'Performance' Welsh Mules sired that perform above-average on the index of recorded Blue-faced Leicester Rams.

All 'Performance' Welsh Mules in any one pen must be sired by a Blue-faced Leicester Ram with an index in the top 50% in the year of purchase, according to Signet 'Performance' recorded data. This data is also available on the BASCO website.

Each 'Performance' Welsh Mule breeder can contact the Blue-faced Leicester Sheep Association for a certificate which highlights the identity of the qualifying ram or rams used. These certificates can be displayed on the pens at the Welsh Mule sales.

All 'Performance' Welsh Mules will be identified by the initials '**PM**' on their ear and each lot of 'Performance' Welsh Mules will be identified in the sale catalogue with the letters PM shown in bold, immediately after the lot number e.g. if lot 371 is a pen of 'Performance' Welsh Mules then it will appear as 371**PM** in the catalogue.

In 2013, Blue-faced Leicester Rams with an index above 97, and in 2014 an index of 111 were marked as Qualifying Rams for the purpose of producing 'Performance' Welsh Mules and this status remains with the ram for its lifetime.

The Welsh Mule Sheep Breeders Association and Blue-faced Leicester Association will continue to work together as this initiative develops.
